

Madrid Inset 19kw Pellet Boiler

Technical Features

Steel version - Dimensions: 830x790x730 mm
 Introduced power : 19,34 kW
 Water power output : 14,68 kW
 Convection and radiation power output : 2,67 kW
 Power performance : 89,70%
 Heatable volume : 108 - 489 m³
 Hourly consumption: 0,98 - 3,95 kg/h
 Rated power absorption : 95 W
 Boiler capacity: 20 L
 Tank capacity: 32 Kg
 Mimimum stroke: 10 - 12 Pa
 Smoke outlet diameter: 80 mm
 Steel version - Weight: 150 Kg

Features

Insert with pellet boiler for the production of hot water for heating:
 steel structure
 high efficiency electronic circulator, expansion tank and safety valve
 possibility of remote thermostat connection
 removable (easy maintenance)
 pellet loading through a duct, that could be placed frontal facing or side facing
 buffing frame included
